

UWE Bristol: transforming your business is our business

Welcome to the summer edition of UWE Bristol's innovation and business growth e-update. We are involved in several upcoming events that we thought you might like to know about. There are also opportunities for companies with an interest in sensor technology to help shape future support, and for aerospace companies to undertake student projects.

Festival of Leadership

On 17th - 19th November 2016 UWE Bristol and the Leadership Centre will join forces to curate the inaugural Festival of Leadership, with a theme of 'Rethinking leadership for an uncertain world'.

To find out how you can be involved visit:

www.festivalofleadership.org

Exhibit at Best of Britannia West

UWE Bristol is delighted to be working in partnership with Best of Britannia to bring their BOB event to Bristol for the first time on the weekend of 5th and 6th November.

Exhibitors will showcase their brands to a UK and global audience that is passionate about supporting and buying British made products. The BOB West event will enable British brands to put themselves in front of an affluent and opinion-forming demographic. Previous regional events have secured huge regional media, online and TV coverage and BOB West will be no different.

If you are interested in exhibiting at BOB West or would like further information, please contact Event Director Joe Pidgeon.

MBA Taster Session

Get a flavour of what UWE Bristol's MBA can do for your career at our MBA taster session on 7 September.

This event is the perfect opportunity for you to experience first-hand our teaching methods as well as giving you the opportunity to meet and network with like-minded business professionals.

Date: Wednesday 7 September

Time: 09:00 – 13:30

Venue: UWE Frenchay Campus, Bristol

Full or part-time study options are available and we welcome a range of managers from business and public services backgrounds.

Following the taster session you can enjoy a light lunch and an opportunity to network and talk openly to tutors and current students.

Call for Student Aerospace Projects

UWE Bristol's talented Aerospace Engineering students are looking for live project briefs from employers, to help them gain practical 'real world' experience.

Project themes with a focus on 'wing design and optimisation' (preferably with fluid dynamics and aerodynamics principles challenges) or 'aircraft design and optimisation' (preferably with a focus on wing optimisation and aircraft stability/control principles) would be particularly appreciated.

The students would work in groups to address the brief, before presenting their work/solutions to you, alongside their programme leader.

Feedback on Sensor Systems Catapult

[The Knowledge Transfer Network](#) would like to hear from companies that have an interest in sensor technology. Whether your business operates in the high tech, environmental, manufacturing, building, biosciences, healthcare or other sectors, they want to gather your opinions.

The UK has a growing network of Catapult Centres each of which has been established to meet an industrial need.

A Sensor Systems Catapult would be a facility that pulls together experts and businesses from

across the Sensor Systems domain allowing collaboration and acceleration of sensor-based solutions.

Please help the KTN by completing a questionnaire about how a Sensor Systems Catapult might impact your business.
