Get ready for MRes Applied Sciences

I hope that you are enjoying your summer and are looking forward to starting at UWE Bristol. As your Programme Leader, I warmly welcome you onto the **MRes Applied Sciences**.

I have provided some information below that will help you to prepare for starting with us. I look forward to meeting you.

Adrian Crew
Programme Leader

Before you start

We are looking forward to welcoming you in the week commencing 14 September for Starting Block and the beginning of your programme.

Starting Block will help you settle into university and to help you get to know your teaching team and course mates. We will help you find your way around, get used to our systems, and practise the skills you need to make a strong start. Look out for further emails and explore the Starting Block website with more details.

Your timetable will be available to you via MYUWE (login required) once you have started the enrolment process. Please visit the 'Understanding your teaching timetable' website to find out when your timetable will be published.

Preparing and arrival
You can find everything you need to know about enrolment, Starting Block and the start of teaching, on our Preparing and Arrival webpage. Take a look at our website to familiarise yourself with our facilities and services such as the library, study skills, academic support, health and wellbeing support and much more.

Enrolment
Once you have satisfied all admissions requirements, we'll send you your login details for our IT systems to enable you to activate your university email account. Once your account has been activated, you'll gain access to the MYUWE platform where you can enrol. Note that your login details for MYUWE are different to those used for the UWE Welcome website. Enrolment for September programmes will only be open from August onwards. You can find guidance and further information on our Enrolment website.

ID card - upload your photo now
We can only print your ID card if you have added your photo to MYUWE. To avoid delays, upload your photo as soon as possible. For help, go to our student card guidance.

Key dates

- **Research Training and Professional Development (USSKDB-30-M):** Assessment for this module is a portfolio to be submitted September 2027
- **Research Theory and Practice (USSJGX-30-M):** Assessment for this module will be a reflective essay to be submitted January 2026
- **MRES Extended Research Project (USSJQP-120-M):** Assessment for this module includes a proposal to be submitted November 2026, a Thesis submitted at the end of August 2027 followed by a viva during September 2027.

Engage with your programme

Start your learning
I would recommend you join, at the beginning of your year, any relevant UK or international professional society (Royal Society of Biology, Royal Society of Chemistry, etc.) so that you can apply for additional funding to attend conferences during your MRes. Your project supervisor will be able to advise you on this.

Read around your subject
A key skill which is required to achieve a high level of success within your chosen programme is the ability to think critically about key issues and practices. To help you to enhance these skills and be ready to engage with your studies, you should start to read and research around your subject before you arrive. Explore the Library web pages to see the wide range of resources available to you once you become a UWE Bristol student.

Make sure to liaise with your project supervisor regarding the preparation of your extended research project. They will be able to suggest any scientific material that you might want to read in advance.

Be prepared

Access support

Check the information on our Disability web pages so you know what you need to do. If you need any urgent additional mobility or other support to fully access all activities during your studies, contact me as your programme leader.

Get equipped
The University has computers on all our campuses for you to use during your studies. These provide access to our core digital learning tools and any specialist software required for your course. You may have scheduled sessions in computer labs or other specialist facilities, and you will be able to use open-access PCs for self-study.

UWE Bristol licenses many specialist software packages for use on personal laptops for the duration of your course. If you're struggling to meet the financial demands of your course, please contact the Student Money Service team for advice and guidance.

See the UWE website for detailed information on choosing your IT equipment including recommended specifications (please read the section of 'Hardware').

For this programme, we recommend the **Core Specification**.

The university licenses many specialist software packages for use on personal laptops for the duration of your course. These packages will run on Windowsdevices and occasionally on other devices. **Make sure to talk to your supervisor regarding specific scientific software you might need to use to conduct your research so that these can be sourced and checked for compatibility.** These tend to operate more commonly on Windows and please be aware that software may need to be purchased on your project budget.

International students
The Global Student Support Team offer information and advice to ensure you receive all the support you need to get the best from your time at UWE Bristol. They are here to help you to settle in when you first arrive at UWE Bristol and organise social events to help you to adapt to your new environment.

Who to contact if you have questions

For any questions about the course, please contact the Programme Leader:
Adrian Crew via email at adrian.crew@uwe.ac.uk

Please note: this information has been provided on the assumption that you will meet the conditions of your offer and be eligible to take up your place.
