

## 19. Sustainability

The University is strongly committed to sustainability. UWE Bristol is committed to addressing the issues arising from the imperative for sustainable development. Simply put, this means playing our part in ensuring we support the global sustainability agenda for a strong, healthy and just society living within environmental limits. We have developed policies, plans and strategy to support sustainable development and implemented these into the business of the University both in our educational role and in the management of our estate. This is overseen by a high level University Sustainability Board and action devolved to Services and Faculties to embed sustainable development into our business decision making. The University expects its researchers to be mindful of sustainability issues which arise in the context of research. The University's Environmental Policy and sustainability documents can be found at:
