

THE POWER OF NOW

POSTGRADUATE AND PROFESSIONAL PROSPECTUS 2020

“

Time and again, postgraduate students tell us they have only have one regret... not starting sooner. That's why we're so committed to making now possible for you. From flexible study patterns through to extra help with study skills, advice on funding, and links with exciting employers like Aardman, the BBC, CERN and the NHS, we're here to make now your time.

Professor Steve West, Vice-Chancellor

TEF Gold

We have been awarded a Gold rating in the 2018 Teaching Excellence Framework (TEF), the Government's higher education ranking system. This means we are among a select number of UK institutions that deliver the highest quality of teaching, learning and graduation outcomes for our students.

We're investing in supporting you to succeed.

WHY POSTGRAD?

If you've been considering the right time to start further study, the answer's now.

Whether you want to accelerate your career, start something new, or boost your knowledge and prospects, make now your time and study with us.

Over 5,000 students have seized the moment since 2016, successfully turning those 'what if' dreams into 'what next' reality. Research is the first step, so read on, feel inspired, and see where postgrad study could take you.

Proof that it's possible

- 98% of UWE Bristol postgraduate students are in professional work or further study within six months of graduation. (Destination of Leavers from Higher Education Survey, published 2019)
- UWE Bristol is 6th in the UK for postgraduate student satisfaction. (Postgraduate Taught Experience Survey, published 2019)
- 91% of postgraduate students are satisfied with the quality of their course. (Postgraduate Taught Experience Survey, published 2019)

More accessible postgraduate and professional study

There's never been a better time to step up, achieve more and see how much you are capable of. We'll support you to succeed with:

- Flexible study options to fit around real lives.
- More opportunities to get experienced through placements, internships and flexible modules.
- Exceptional resources and facilities, with over £300 million invested since 2014.

There's ample evidence in this prospectus to prove our commitment to postgraduate success as you apply, as you study, and long after you graduate, and we welcome any questions you may have. Because we are as excited about your future as you are.

TOP FIVE REASONS WHY

01

Vital real-world experience

Hands-on briefs, real-world projects and practical placements mean you can make vital connections as you build new professional skills.

Find out more on page 8.

02

The right track for you right now

Study online and offline, full-time or part-time, on taught and research courses and in a wide range of disciplines. There's flexibility to balance study with real life, and the facilities and support to make it really work for you.

**Find out more about flexible study on page 12
and facilities on page 30.**

03

Support to make now possible

Our postgraduate student population is varied and diverse. We understand the commitment it takes to study – and the extra support postgrad students need with everything from funding to finding the time.

Find out more on page 16.

04

Fully accredited courses

Many courses are accredited by top professional bodies including the Chartered Institute of Management Accountants (CIMA), Nursing and Midwifery Council (NMC) and Royal Institute of Chartered Surveyors (RICS)

Find out more on page 92.

05

Top teaching inspired by industry

Enjoy passionate and supportive teaching from some of the brightest thinkers, plus get of-the-moment industry insights as part of our Distinguished Address Series.

Find out more about our ground-breaking research on page 32.

Next step: get started

Detailed course information on page 36.

All about finances on page 18.

Did you know?

Our 'routes into profession' courses are your fast-track into careers in business, law, education and more – regardless of the subject of your undergraduate qualification. **Get the inside track on page 8.**

ENHANCE YOUR CAREER PROSPECTS

Postgraduate study unlocks the door to a brighter future, and our courses are designed with your career prospects in mind. You'll build knowledge, skills, connections and confidence that make all the difference in the workplace.

Developing the skills the workplace needs

Working directly with businesses and professional bodies to shape our course programmes means your skills will be in demand. Because we actively research what employers are looking for, you'll stand out on paper, and in person.

Network with employers – locally, nationally and globally

Our employer connections open doors when it comes to boosting your work experience. From professional career consultants to industry placements, volunteer opportunities and networking events, you can make sure you finish your course with the perfect balance of knowledge and real-world experience.

Renowned and accredited programmes

We offer 80 programmes that are accredited by top professional bodies, so your qualification will be recognised by industry and sought after by employers.

Become a global citizen

Employers increasingly look for graduates with global experience and intercultural awareness, and here both are open to you. Build an international network, discover different cultures first-hand and be aware of best practice in your field at a global level.

Good to know

Many students can now access postgraduate finance through Student Finance England. You can borrow the funds to make study possible, but only start making repayments when you are earning over £21,000 per year. **Find out more about how to pay for postgrad on page 18.**

MEET ELE

At a glance: UWE Bristol alum Ele used postgrad study to boost her skills and stand out to employers. With the help of the Vice-Chancellor's Scholarship, she's built on her undergrad skills to help launch her marketing career.

Ele initially graduated from UWE Bristol in 2017 with a successful BA(Hons) in Product Design and a work placement under her belt. Entering the world of work, she quickly realised her career would benefit from the additional skills that postgrad study offers.

"I decided to build additional business skills to complement my undergrad degree. Industry is increasingly competitive, and many junior creative roles require knowledge of marketing too."

But there were barriers to overcome...

"Finance played a part in my decision. Fortunately, postgrad student finance had been introduced which really helped. I was also able to benefit from the Vice-Chancellor's Scholarship which discounts tuition fees by 50%."

The course itself was exciting and immersive. Ele sums it up as "a hugely insightful conversion into marketing – fast-paced, covering a plethora of subject areas: strategy, analysis of consumers and industry, communications and marketing research."

Quite a jump from product design, but building a new skill set was actually much easier than she imagined. In the end Ele's biggest surprise was how possible postgraduate study really is:

"When I completed my undergrad degree, I never thought I'd go on to a master's programme two years later. I'd always considered it 'too academic' and didn't think I was the right candidate for it. But I am so glad I took it on; it's given me an opportunity to learn much more about myself and my capabilities, professionally and personally."

MSc Marketing

MORE

uwe.ac.uk/postgrad

Good to know

If you need to balance family commitments and study, our on-site nursery saves time on pick-ups and drop-offs.

Find out more about how we support postgrad students on page 16.

WAYS TO STUDY

Part-time, full-time or top-up, there's a postgrad option for you. We give you more choice so you can balance the demands of work and real life, and take action to achieve your ambitions.

Flexible study options:

- Full-time – an immersive experience that requires a bigger time commitment but achieves faster results.
- Part-time – the same high-quality taught course as the full-time option, but more feasible to manage around work and other commitments.
- Flexible – including Professional Development Awards that let you tailor your education to suit your ambitions and situation.
- Short – tasters and targeted skill-boosters.
- Distance – some courses can be studied remotely.

Routes into a profession

These are postgraduate courses that can give your career a new direction. Build on the skills and knowledge you developed during your undergraduate degree (if you did one) and gain focused skills relevant to employers in:

- Business and Law
- Education and Childhood
- Environment and Technology
- Health and Applied Sciences

MORE

uwe.ac.uk/studyoptions

I had a very positive experience. I was able to schedule studies to fit around work and family life. The support from staff was first class and that is why I'd recommend this course.

Robert, LLM Advanced Legal Practice

STUDY OPTIONS

Taught master's degrees

A master's degree involves detailed study of a particular aspect of your academic discipline. You'll gain an MA (Master of Arts), MSc (Master of Science) or MBA (Master of Business Administration), and the course focus will be one of the following:

- Vocational and accredited by a professional body.
- A course that provides a clear route into a profession.
- A way of developing your knowledge and skills in a new subject.

How long does it take?

- Full-time – 12 months, made up of a nine-month taught element and a three-month research project.
- Part-time – around three years, including the research project. Many people choose this option, and the exact timescale will depend on how the individual course is delivered.
- If you stop at 60 credits then you will gain a Postgraduate Certificate and at 120 a Postgraduate Diploma.

Professional Development Awards

Build your own degree by making the most of previous qualifications and experience. Based on a credit system you can achieve Postgraduate Certificate or Diploma level through a variety of taught modules and professional short courses.

Professional and short courses

A fantastic way to develop new skills or enhance and update existing ones without committing to long-term study. There are courses in everything from Air Quality and Big Data to Events Management and Workplace Wellbeing.

Research degrees

Postgraduate research degrees give you the opportunity to contribute to our vibrant research community. With dedicated support from our team of experts, you'll undertake independent research in your chosen area. Courses on offer include:

- Doctor of Philosophy (PhD)
- Master of Philosophy (MPhil)
- Professional Doctorate (Prof Doc)

MORE

uwe.ac.uk/studyoptions

Good to know

If you're planning on changing career or don't have an undergraduate degree, you may be able to apply using credits from other academic institutions Accredited Learning (AL) or get exemptions based on your previous work experience – Accredited Experiential Learning (AEL).

**90% of postgraduate students are satisfied
with learning resources and support services.**

Postgraduate Taught Experience Survey,
published 2019

**SUPPORTING YOU
TO SUCCEED**

When it comes to postgraduate study, the right support at the right moment makes all the difference. **Your support network is ready and waiting.**

You'll be part of something special, a real community where everything is set up to help you feel supported and inspired. As well as a wide range of academic help, we're also here with more personal support if you need it.

Supporting you

It's about providing whole-person support, including health, faith and wellbeing. From our Student Support Advisors to free telephone counselling and confidential 24/7 support services, there is a range of wellbeing resources available when you need them. The Students' Union is a great place to try new things, meet new people and get involved in everything from dodgeball to drama.

Supporting your studies

From the moment you join us, you'll get all the practical and academic support you need to thrive. This means inspiring working environments, accessible tutors, extensive library and research materials, quiet study spaces and study support whatever your course or campus.

Supporting your family

The Halley Nursery, on Frenchay Campus, offers high-quality childcare and education for children aged three months to five years. It's a welcoming purpose-built spot with a beautiful leafy garden, and can really help you balance study and family commitments.

Supporting diversity

From Black, Asian and Minority Ethnic (BAME) networking and coaching with the Equity student programme, to our welcoming and well-supported LGBT+ community, we're really passionate about valuing and empowering diversity. And our Disability Service is here to make postgraduate study accessible to all.

MORE

uwe.ac.uk/pgsupport

HOW TO PAY FOR POSTGRAD

If you're ready to step up to postgrad but money is an issue, we can help you make the figures add up, so finances don't stand in your way.

Postgraduate loans

These (PGLs) are available from Student Finance England to study a master's course. Master's students under 60 can access a loan of up to £10,906 as a contribution towards the cost of study. This is the same kind of finance as undergraduate Student Loans; you only start to pay it back once you're working and earning over £21,000 per year.

Help from employers

Many current part-time students are supported by their employers, so that can be a great option if you're currently in work. Negotiating study support as part of your package is a 'win-win' for you and your employer: they get a more highly skilled person who is making a long-term commitment to their organisation. And you get all the benefits of postgrad study with the peace of mind of a regular income.

Scholarships

UWE Bristol Alumni Discount

We offer eligible UWE Bristol alumni a tuition fee discount of 15% on select full-time and part-time taught postgraduate courses.

Vice-Chancellor's Scholarship

You can apply for this scholarship if you have either graduated from, or are due to complete, a full or part-time UWE Bristol undergraduate degree in the current or previous academic year. It provides a tuition fee discount of 50% on selected full-time and part-time postgraduate courses.

There are also special MBA, Sports and vocation-specific scholarships.

Scholarships are subject to availability, course selection and eligibility.

Other funding

- Research Council Funding – competitive awards which may cover some or all the tuition fees, a maintenance grant or bursary and a contribution towards programme-related expenses.
- Bank loans – banks offer special loans for postgrad study, usually at more reasonable interest rates with a 'repayment holiday' that lasts until you are back at work. Talk to your bank to find out more.
- Support from trusts and charities.

Fortunately, postgrad student finance has been introduced which enabled me to enrol. I received 50% off the tuition fees thanks to the Vice-Chancellor's Scholarship, which was set up to help UWE Bristol undergrads enhance their careers.

Ele, MSc Marketing

MEET JAMES

At a glance: James is a wildlife filmmaker who spends his days documenting the secret lives of wild creatures. It's a long way from civil engineering, the career he started out in...

"My journey so far has certainly been eventful! I actually grew up in Australia, then moved to the UK and fell into a career in Civil Engineering. I really enjoyed the travel and the challenges, but by my late twenties, I was thinking "Is this it?"

"That's when I decided to make a change. When I was 29, I landed a job working as a zookeeper in Canada. It was an amazing experience, and opened my eyes to the possibility of a career in wildlife filmmaking. I returned to the UK with a clear plan: first to study animal biology, then to make the jump and gain the practical skills to become a filmmaker. Following my undergrad studies, UWE Bristol was the clear choice for me because of the connections with industry.

"The course was great, I graduated feeling really confident about my practical skills and my network. There were so many opportunities to connect with Bristol's natural history and wildlife filmmaking scene. My mentor was the series producer for Countryfile, which really helped, and there were great guest speakers from both the BBC and the independents. My MA helped me get my first work experience placement, working for a month on the One Show wildlife segment.

"If you choose UWE Bristol for filmmaking, you're getting a great name on your CV. As students, we know about the BBC – and now I know that the BBC knows as much about the degree."

Documentary Production MA

AN INTERNATIONAL COMMUNITY

Take on a world of opportunities by joining a diverse community and build networks that span the globe.

A welcoming and supportive environment for all

Bristol is a diverse, multicultural city with over 45 religions, 187 countries of birth and more than 91 languages spoken. Our inspiring staff and dedicated Global Student Support team is here to help you feel at home and take that next step. You can expect:

- Information Points on each campus to answer your questions.
- Gradlink, a UWE Bristol created, specialist website giving you access to graduate roles and global employers.
- Career guidance via our Careers and Enterprise Service.
- English language support if you need it – before and during your course.
- Advice on support available for families and partners.

You'll also find that friends and opportunities await. Other students are always keen to network and get a global perspective. Our thriving international student community is a great way to meet people and open doors to opportunities overseas.

Alumni the world over

Did you know that our alumni community spans more than 280,000 people worldwide? If you want to expand your horizons and network, you'll start in the right place. In 2019, our diverse alumni community included graduates from France, China, Brazil, the USA and Nigeria.

MORE
uwe.ac.uk/postgrad

Everyone is lovely and helpful, and it's helped me with my transition from undergrad to postgrad. It makes me proud to be a part of an accepting and diverse community.

Dev, MSc Marketing and Communications

MEET DEV

At a glance: International student Dev found a warm welcome when she joined our postgraduate student community. She's overcome personal challenges, and the supportive atmosphere has helped her feel at home and thrive, as she's diversified her skills.

Dev seized the moment when it came to postgrad study. She had just moved to Bristol and knew she wanted to boost her skills and find a new direction. She decided that postgrad study would stand her in good stead for future career opportunities.

"I wanted to increase my chances of employment, so I chose MSc Marketing and Communications as it's such a versatile subject with many transferable skills. I wanted to stay local so I took the plunge and applied at the last minute."

Dev found lecturers supportive and encouraging, the course rewarding, and making new friends easy. That said, we all need someone to talk to from time to time, and she has made good use of the support and wellbeing offering, which she found really helpful: "the people there were so understanding and offered me great resources and advice."

That support has certainly paid off, as Dev is now thriving and has big ambitions for her future...

"I'm hoping to secure a role in digital marketing. I'm currently working with the student social media team, amongst other things, so hopefully that experience will boost my CV too."

CONNECTED BRISTOL

Gain insight into your chosen field as you make invaluable connections with some of the biggest names in industry.

Build what you know – and who you know – by connecting with the best of Bristol and beyond.

A place to thrive

In Bristol, opportunity and quality of life come hand-in-hand. We regularly top the UK polls for happiness, best place to work and live, best city for cycling and walking... the list goes on. There's always something new to discover about the city – even if you're a Bristolian born and bred.

Big brands and bright sparks

Brands including Rolls-Royce and Airbus, Lloyds Bank, OVO Energy and Triodos bank all call the city home. Bristol produces over 25% of the world's natural history films, and is nationally renowned for its creative and cultural scene. The city buzzes with studios and creative businesses, from well-known names like Aardman Animation to the independent artists who set tomorrow's trends. It's a place to connect and get inspired, whatever your ambitions.

Traditional industry and emerging tech

Bristol is a hotbed for both traditional industries – from aerospace to food and drink – and emerging technology. With over 35,924 digital jobs and 225 start-ups, Bristol is home to 17% of the UK's high-growth firms and is now the most productive digital cluster in the UK.

MORE

uwe.ac.uk/bristol

The support is hugely impressive and the links with industry are fantastic.

Innovation and Industry:

Spotlight on Future Space at The University Enterprise Zone (UEZ)

The UEZ at Frenchay Campus is one of just four centres of its kind in the UK. Here, the Future Space project incubates small, high-growth companies through access to space, facilities, business support and collaboration with our research teams. It's about forging partnerships, making connections and sharing the latest thinking throughout industry and research.

MEET WILLIS

At a glance: Willis is the first in his family to go to university, and he has found the experience life-changing. During his time here he has discovered a passion for learning and research, which – combined with lots of potential – has seen him achieve amazing things.

Willis joined UWE Bristol in 2014, ready for a fresh start. He didn't love school, but in the university environment he quickly grew and developed, discovering a new love of learning. He graduated with First Class honours and prestigious Dean's List placements two years running. His undergrad experience had opened up a whole new direction...

"My third year project was in medicinal chemistry, something I wasn't expecting when I chose Forensic Science. I loved this new field of study and through it I discovered a new passion, which brought me to my master's degree. Now I'm specialising in Synthetic Medicinal Chemistry; synthesising and testing new anti-cancer drugs."

It's been quite a journey, and one that Willis is really proud to have taken with us.

"Looking back, I never thought I would have come this far, to now be studying this discipline at this level. Coming to UWE Bristol was a very good decision for me, and I couldn't have predicted how much I would gain from my time here. It has certainly changed my life and who I am."

He feels he has learned a great deal about both his subject, and himself:

"I've become a much more confident and capable person. I'm proud of what I've done, and feel ready to keep growing and progressing. I'm now predicted to pass with distinction in my Masters in Research."

FACILITIES

Whether you're starting a new career or building specialist skills, postgrad is about becoming ready and prepared. Professional confidence is more than knowing it, it's practising and proving it too.

What facilities are waiting for you?

We believe in continued investment to enhance your student experience. And because we're always looking to the future, many of our practice-orientated spaces offer just what you need to succeed.

There's too much to list, but here are some highlights:

The Film Studios at Bower Ashton – our award winning, industry-standard film production facility.

The Business and Law Building – City-style offices fully equipped with simulated law courts and trading rooms.

The Laundry at Glenside – real ward experience and practical learning spaces for healthcare students.

The Escape Studios – pro-quality studios perfect for creating Pixar-style computer aided animation.

The Engineering Building – due for completion in summer 2020, our engineering building will be home to engine test cells and wind tunnels.

You'll also have access to a full range of virtual learning tools, an extensive library service, plus a purpose built Students' Union, Centre for Sport and Student Centre at The Farmhouse.

MORE

uwe.ac.uk/ourfacilities

Good to know

Since 2014 we've invested over £300million in our academic buildings, teaching facilities, technology and equipment.

Frenchay Campus

The heart of UWE Bristol, Frenchay Campus is just four miles north of the city centre and home to many of our new purpose built facilities as well as the Students' Union.

Glenside Campus

Historic and beautiful, Glenside boasts our state-of-the-art healthcare education facility including a Skills and Simulation Centre, designed to replicate a genuine clinical environment.

City Campus

Home to our creative and arts faculties, City Campus spans Bristol. Whether you're studying at Watershed, Arncliffe, Spike Island or Bower Ashton, the combination of iconic locations and industry-grade kit will fire your imagination.

Good to know

79% of our research is considered to have or have had an outstanding or considerable impact in economic or social terms. Research Excellence Framework 2014.

RESEARCH AT UWE BRISTOL

Our research spans many disciplines but shares a vital thread: making the world a better place. We offer research courses that see you develop your knowledge and skills as an independent researcher as you contribute to a brighter tomorrow.

Postgraduate research degrees

Doctor of Philosophy (PhD)

Based on independent research, you will complete a thesis of either 40,000 or 80,000 words depending on subject area plus an oral exam (viva voce). You will also gain 60 taught module credits where you will be able to develop your subject-specific expertise and professional skills.

Master of Philosophy (MPhil)

You will complete a thesis based on an independent area of research of either 20,000 or 40,000 words depending on subject area plus an oral exam (viva voce). You will also gain 60 taught module credits where you will be able to develop your subject-specific expertise and professional skills.

Professional Doctorate (Prof Doc)

The structure of the Prof Doc programme varies, but will comprise a taught element, submission of an independent thesis plus an oral examination (viva voce) leading to a professional qualification.

Research with real-world impact

Home to researchers fascinated by real-world challenges, we solve problems that make a difference in everyday lives. Exciting, inspiring and rewarding, this is research with real-world impact.

And this is also making a difference closer to home too. Research informs our teaching and contributes to an atmosphere where the latest ideas are shared and explored. Meet Ioannis, one of our researchers who is making this happen....

MORE
uwe.ac.uk/research

“

We have plans to take Pee Power to countries such as India, Kenya, Sierra Leone, Uganda and Burkina Faso to bring power and sanitation treatment to places where it is most needed.

Professor Ioannis Ieropoulos

IOANNIS IEROPOULOS

PEE POWER: delivering sustainable energy and sanitation

Turning pee into power by advancing microbial fuel cell (MFC) technology in developing countries. The project is led by Ioannis Ieropoulos, Professor of Bioenergy and Self-Sustainable Systems, and a Director of our Bristol BioEnergy Centre. Ioannis is supported by a team of over 20 researchers working on a variety of projects. His own special interest is in waste utilisation and energy autonomy. The research is supported by the Bill and Melinda Gates Foundation.

Challenge

Over two billion people worldwide don't have access to basic sanitation facilities, and a billion of these are also without electricity.

Action

The team developed new technology using MFC to clean human waste while generating electricity. These microbial fuel cells turn pee into power, making a real difference in developing countries.

Pee Power is unique. It uses inexpensive, locally-available materials like ceramics, providing a feasible solution for communities who really need it.

Pee Power urinals have been at Glastonbury Festival since 2015. Starting as a test of the MFCs in action, this has gone on to highlight the lack of basic sanitation and electricity worldwide and demonstrate how technology transforms lives.

Results

Pee Power is now being used in boarding schools in Kenya and Uganda, where electricity produced from human waste is being used to illuminate toilet blocks. Before Pee Power was introduced, female students were at risk of being attacked when using toilets at night.

Survey data from the Seseme Girls School, Kisoro, Uganda, shows a dramatic increase in confidence among students using the facilities at night. Headmistress Peace commented:

"The girls used to fear going to the latrines at night and we had strangers getting into the school. Ever since we got this [Pee] power, we have not had this problem. They are no longer scared and can go freely to the latrines."

What next?

A new company, Robial, has been set up to commercialise the technology and make it available globally.

Solve future business challenges

You'll receive excellent teaching with a personal approach. Many of our staff are, or have been, working in accounting firms and the finance industry, or are active researchers publishing in leading journals.

Be inspired by business leaders at one of our networking events. Our distinguished address series of lectures has featured Baroness Shriti Vadera, Chair of Santander UK and Kevin Ellis, Chair and Senior Partner, PwC UK.

Our purpose-built £55 million Business School gives you access to Harvard lecture theatres, technology-enhanced teaching areas, and social learning spaces ideal for group work and collaboration. You can access the latest company data and analytics in our Bloomberg financial trading room. It's the very same system used by investment banks, giving you a commanding view of global markets and outstanding opportunities to enhance your analytical skills in accounting and finance.

As well as the knowledge and expertise you'll need to achieve your goals, you'll refine the professional skills that are crucial in today's jobs market. You'll have the opportunity to gain consultancy experience through our Business Advice Clinic, offering pro-bono guidance to small local businesses alongside our partners Grant Thornton. Communication, networking and presenting, strategic thinking and creative problem solving are just some of the essential skills that make our postgraduates stand out from the rest.

I love the Bloomberg trading room for financial and economic analyses as well as stock trading, it's really hands-on. The learning facilities are extremely modern – technology at its best. I'll leave equipped to deal with real-world challenges.

ART

Bring commitment and creativity, and we'll match it with the connections and facilities to spark success. You'll enjoy inspiring teaching, masterclasses with guest experts and practice-based projects to fuel your passion and push you further.

Find out more by visiting:
uwe.ac.uk/subjects/art

Expand your practice, your perspective and your possibilities

Join our inspiring communities at Arnolfini and Spike Island – both internationally renowned centres for contemporary arts – and Bower Ashton, our well-resourced home. Try new techniques and test the boundaries of your imagination with facilities ranging from traditional tools to the very latest digital technology.

Multidisciplinary print specialists benefit from the innovation and research that's synonymous with our Centre for Fine Print Research. You can use facilities for techniques like etching, 3D scanning, casting and printing. Meanwhile, our MA Curating is built in partnership with regional and national heritage and culture providers including the V&A, M Shed, Martin Parr Foundation, Bristol Museum and Art Gallery, and includes a guaranteed placement. This diversity sums up the spirit of adventure, applied innovation and thrilling possibilities on offer.

Whatever your speciality, we'll give you a platform to expand your network with influential employers, mentors, collaborators, artists and creative professionals. Then we'll help you get experience and exposure, thanks to our partnerships with cultural institutions, festivals, exhibition spaces and more. And for practicing creatives, our annual Degree Shows – visited by thousands – are a highlight in the South West's creative calendar, and an outstanding opportunity to showcase your work.

BIOSCIENCES

Together, we seek to understand the challenges our world is facing and aim to resolve them. Join our community of bright, passionate pioneers who are naturally curious and motivated by an unwavering belief that their work really matters. Develop relevant skills for your career or research through a balance of insightful learning, the latest facilities, expert research and productive partnerships.

Find out more by visiting:
uwe.ac.uk/subjects/biosciences

Explore and improve the world around you

Our partnerships are integral to providing the working knowledge and networks that you'll need to help you realise your ambitions. We work with local, national and international leaders in the sector such as GlaxoSmithKline and the NHS to ensure you're learning and researching the latest theories and ideas.

Explore new concepts and enhance your technical skills in our dedicated study spaces. We've invested over £3 million in the latest lab facilities and technology. You can even gather data from drones using specialised software in our digital technology suite. All this enables you to develop key skills and experience that will prepare you for your next steps towards a professional future.

BUSINESS MANAGEMENT

Studying with us will equip you with the leadership qualities and real-world skills necessary for that next professional step. Our contribution to entrepreneurship has been recognised by the Chartered Association of Business Schools and we're one of 37 UK business schools to hold the Small Business Charter award.

Find out more by visiting:
uwe.ac.uk/subjects/business

Advance yourself with unlimited business possibilities

Be inspired by the diversity and entrepreneurial energy that surrounds our leading Bristol Business School. Purpose-built with you in mind, it provides the best possible inclusive and innovative learning experience with the feel of a genuine business environment. You'll benefit from Harvard lecture theatres, technology enhanced classrooms and flexible social learning areas, and share a variety of collaborative spaces with organisations that mirror our practice-led approach to learning, such as the Institute of Directors (IoD).

Through enthusiastic, research-active experts and visiting speakers, you'll learn from industry examples and engage in real business simulation projects. Alongside learning with an international focus, there will be opportunities to work with local companies, and to share your expertise with small businesses through our Business Advice Clinic. Teaching is current, practice-led and designed to prepare you for the challenges and decisions you'll face in your career – enabling you to be bold, take risks and fulfil your business potential.

COMPUTER SCIENCE AND CREATIVE TECHNOLOGIES

Become an authority in a science that shapes every area of our lives. Advance your career in this ground-breaking field and use your skills to influence the way we live, work and play. Experience outstanding teaching, hands-on learning and access to industry-leading technology and contacts.

Find out more by visiting:
uwe.ac.uk/subjects/computing

Enabling creativity through technology

Join us at the cutting edge of 21st century computer science research and explore areas such as artificial intelligence, cyber security and data science. In creative technologies you'll explore serious gaming, the use of technology for sound design, music composition and performance. Discover the impact AI can have when computer science and creative technologies join forces. Here you'll see virtual environments and interaction mechanics being used to help understand imagery and design tasks.

Equip yourself with the latest industry knowledge and learn from outstanding experts on our NCSC accredited* MSc Cyber Security course (accreditation is provisional in the first year). Work collaboratively

with colleagues in the Bristol Business School on our MSc Financial Technology course where technology and finance work together to identify new approaches and techniques. Interdisciplinary working and a breadth of experience from our lecturers and researchers will prepare you for real-world challenges.

Benefit from industry-standard hardware and software. Creative Technology and Commercial Games Development students can access a games studio, video facilities, sound recording studios and post-production facilities.

CONSTRUCTION, PROPERTY AND SURVEYING

Gain the skills and knowledge to really stand out in the construction industry. You'll experience an empowering mix of practice and theory – preparing the foundations for a successful career as a leader in this exciting field, then making the connections to build on them.

Find out more by visiting:
uwe.ac.uk/subjects/construction

Building a brighter future

Get prepared for success in an ever-evolving field by learning from the best. You'll be taught by construction industry experts working at the top of their fields. Your learning will be informed and inspired by site visits across the UK and through links with major construction firms. Develop innovative skills in Building Information Modelling (BIM) and refine the practical skills you'll need in real working environments.

These courses are designed to give you a competitive edge; helping you to develop your career as a leader in the construction industry. Our construction and real estate partners BNP Paribas, Balfour Beatty, Interserve, Capita Symonds, Savills and Laing O'Rourke offer you access to exceptional industry knowledge, placements and recruitment advice.

Spark inspiration and fire creativity

Discover how you can expand your practice and explore new techniques taking a cross-disciplinary approach. Evolve your communication approaches and explore new ways to connect. Immerse yourself in a creative journey where you'll learn through real-world problem solving, discover new possibilities and perhaps even change the world of design as we know it.

Inspiration is never short and facilities are well equipped. Support is on hand from academics and technicians who are all successful practitioners engaged in research and creative practice. Guest speakers from industry and live collaborative projects provide invaluable opportunities to gain real-world knowledge and experience. There's opportunity to cut your teeth in new ways, discovering new 2 and 3D design areas across our practice-based making workshops, working with wood, casting, metal, perspex, glass, resin and textiles. In Graphic Arts, you'll explore a range of techniques including motion graphics, typography, drawing, print and photography. You can push the boundaries of digital possibilities, making the most of industry standard facilities, re-skilling and technical support, and a creative atmosphere where imagination thrives.

ECONOMICS

Why are some countries rich and others poor? Who are the most powerful players, and why? What is the future of globalisation? If you want answers to the world's big questions, and are driven to create a fairer and more just society, join us to explore the global political economy.

Find out more by visiting:
uwe.ac.uk/subjects/economics

An interdisciplinary, applied approach to solve the big challenges

The global economy is changing, fast. Understand what's happening and influence it by connecting economics to the bigger picture. Develop your capacity to think critically, debate and drive change at the heart of an active research community. Gain a broad understanding of global issues – based on many schools of thought – and apply it to real-world challenges. Graduate equipped with an understanding of issues facing businesses, workers and nations, and the skills in policy analysis and development to make the world a better place.

Our cross-departmental teaching staff bring big issues to life, exploring topics including equality, social justice, environment, sustainability, labour markets, gender and feminism. Inspiring and well-connected, they share diverse perspectives and networks, spanning the UN, World Bank and leading NGOs. They are supported by guest speakers such as economic advisors to the EEC and policy leads from Oxfam. You'll have the chance to get involved in the Bristol Economics Festival – where your questions are answered by top thinkers – and there are many opportunities for placements and internships. We particularly welcome part-time students and career-changers. This is an open course where potential is most important. Scholarships are available, and we schedule lectures in blocks to work around other responsibilities.

EDUCATION AND TEACHING

Do you have the talent to inspire people to reach their full potential? Are you fascinated by the social, psychological and policy factors that influence young people's lives? At UWE Bristol you'll be part of the future of learning where the latest technology and challenging new ideas are transforming the way we approach education.

Find out more by visiting:
uwe.ac.uk/subjects/education

Inspire the learning of tomorrow

Join one of the largest and most successful providers of postgraduate courses for education and childhood in the South West. You'll have the chance to be involved with the latest thinking in childhood development, education and teaching. You'll experience an exciting, future-facing environment and explore a rapidly changing landscape where new questions are being asked and new understandings are emerging. We have an impressive track record of nurturing highly successful teachers through our initial teacher training programmes, and of supporting the continued academic and professional development of those working and leading in the education, childhood and cultural sectors.

At the heart of everything we do are our partnerships, with more than 200 educational and cultural providers across the South West and beyond. Through these you'll enjoy excellent work-based opportunities, allowing you to explore, share and shape best practice.

We'll also support you in developing your own research ideas as you become a truly transformational professional, nurturing and inspiring the learners of tomorrow.

ENGINEERING

A young woman with dark hair, wearing a white t-shirt, is shown in profile from the waist up. She is holding a black remote control with both hands, looking intently at a small white model aircraft suspended in the air. The aircraft is white with blue and yellow markings and is positioned in front of a large, dark, rectangular opening, likely a wind tunnel. Bright light is streaming from the opening, creating a strong backlight effect. The background is dark and industrial, with structural elements visible. The overall scene conveys a sense of focused engineering work and experimentation.

Bristol is a thriving hub for some of the world's most successful engineering organisations, with the largest aerospace firms in the UK operating in the region. Our close working relationships with industry leaders such as Airbus and Rolls-Royce give you a unique opportunity to be part of a dynamic, forward-thinking community of academics, researchers, practitioners and professionals, dedicated to moving forward, exploring and finding ways to change the world for the better.

Find out more by visiting:
uwe.ac.uk/subjects/engineering

Deliver positive change in the world

Push boundaries and instigate change. You'll be empowered to tackle real-world challenges through live projects, exploring problems and experimenting with solutions. Our partners give us practical insights into the issues they face day-to-day so our courses balance practical application with theoretical understanding. You'll be encouraged to challenge yourself by developing solutions that address the multiple, and sometimes conflicting, requirements that modern organisations face.

Experience our modern equipment and develop the critical thinking and innovative problem-solving skills employers are looking for. With a flight simulator, computer aided design (CAD) suites, manufacturing workshops, wind tunnel and the UK's largest robotics laboratory, you'll have hands-on access to the technology you need to excel.

ENVIRONMENTAL SCIENCE

The world needs scientists who understand life in all its forms – join us and gain the skills to conserve and protect it, and inspire others to do the same. Whether you want to fight for endangered species or shape a more conscious future by bringing science to life, now is your time and this is your place.

100% of UWE Bristol MSc Environmental Health students are satisfied with the quality of their course overall.

Source: Postgraduate Taught Experience Survey 2019

Find out more by visiting:
uwe.ac.uk/subjects/environment

Conserving biodiversity in a rapidly changing world

Whether you dream of gaining the knowledge and skills to protect the world's most vulnerable creatures, undertaking research to better understand our habitat and the species we share it with, or want to inspire others to care – and do – more, you'll find stimulating thinkers, a career-boosting network and a passionate cohort at UWE Bristol.

Make the most of fantastic facilities and connections, working on real-life briefs and studying in a city that's home to the BBC's Natural History Unit, BBC Focus magazine and the award-winning science centre We The Curious. Our communications courses set the benchmark for bringing science to life for all, building skills as well as theoretical knowledge. And the unique, immersive MSc Advanced Wildlife Conservation is delivered collaboratively with Bristol Zoological Society (BZS), so you'll become experienced in complete practical conservation.

Whichever course you choose, we'll open your mind through sessions with guest lecturers and opportunities to gain experience that are as diverse as the world we study. Previous partners have included GlaxoSmithKline, ICI and Novartis as well as the RSPB, Plymouth Marine Laboratory, the Environment Agency and Kew Gardens.

Immerse yourself in a vibrant creative community

With input from industry experts, our courses will prepare you to take your next step into roles across the creative sector. You'll benefit from our strong partnerships with sector leaders, such as Aardman Animations, Martin Parr Foundation and the BBC, through to a growing community of independent production companies and photography studios. You'll learn from the best in the business, gaining industry insight as well as work experience opportunities and the chance to attend networking events and screenings.

Enjoy full access to our £7 million filmmaking, animation and photography facilities. Develop your skills in our professional standard production studios specialising in film, TV, photography and 2D, 3D and stop-motion animation. Our post-production editing, dubbing and digital darkroom suites are equipped with high-end technology and industry standard software.

There'll also be plenty of opportunities to showcase your efforts at our annual Degree Show, or at exhibitions and film premieres, which draw employers, media and talent spotters from all over the UK.

FORENSIC SCIENCE

Do you have an analytical mind-set and enjoy problem-solving? Discover how science is used to unravel the mysteries of a crime scene. Designed with input from experienced professionals, you'll gain an in-depth understanding of the scientific methods used in criminal investigations, and the skills to develop a career in the justice system and beyond.

Find out more by visiting:
uwe.ac.uk/subjects/forensic

Use scientific problem-solving to benefit society

Your learning will follow the journey of evidence from crime scene, through the laboratories and on to the court room. Academic theory is balanced with countless opportunities to get hands-on experience using our outstanding facilities. Learn how to find, analyse and present evidence in a variety of realistic scenarios, including specially-designed crime scenes, industry-standard laboratories and mock courtrooms. You'll gain an in-depth understanding of not only the scientific issues that affect the outcome of criminal trials, but also societal factors such as unconscious bias and juror expectation. You'll also undertake research based on your interests and career goals, using methods that mirror real-life forensic research.

Attend guest lectures with forensic science professionals and join our thriving Forensic Science Society, where you can attend presentations from world-leading practitioners and meet like-minded people to build a learning community.

Your scientific and legal expertise, combined with an enquiring mind, will appeal to a range of employers. Our graduates have gone onto work as forensic DNA analysts, reporting toxicologists, trace evidence examiners and blood pattern analysts, with some of the UK's largest forensic science providers and roles with the police.

GEOGRAPHY AND ENVIRONMENTAL MANAGEMENT

If you want to better understand the world and contribute to creating a more sustainable and responsible future, you'll find your fit with us. Learn from leading thinkers in an inspiring environment where theory blends with practice.

Find out more by visiting:
uwe.ac.uk/subjects/geography

Lead by research, inspired by real life

Are you the kind of mind who is fascinated by environmental and sustainability issues? Join us to explore your passion for subjects like air and water quality, civil engineering, transport and movement, sustainable development and environmental management. Develop skills that will empower you to tackle the challenges and opportunities facing our world. Our staff are researchers and professional practitioners in these fields, enabling you to explore the very latest ideas – then test them hands-on – in a learning environment where research and practice meet.

Your learning will be inspired by real-world experiences and perspectives. Our strong connections with professional bodies and industry provide an important source of influence and offer a benchmark you can take into the workplace. Our facilities, teaching and learning approach, and practical experience opportunities provide everything you'll need to investigate climate change, air and water quality, resources, society and the environment. Local community partnerships will allow you to deepen your understanding of, and response to, social inequality. To bring the theory and research to life, you'll have plenty of opportunities to reinforce your learning with fieldwork.

uwe.ac.uk/subjects/health

Be part of a community that changes lives

Our many accredited courses are designed to help you achieve your goals, whether it's improving patient care or boosting your own career prospects. The work, consultancy and research experience of our staff ensures that your learning is backed up with relevant knowledge of the current issues. Courses are practical, so when you're not learning on campus, you'll be doing work based training in your role or on placement.

Our modern facilities enable you to hone and define your skills in environments that mimic real clinical and community settings. Whether it's undertaking research into human performance in our dedicated Human Analysis Laboratory, or undertaking an ultrasound scan, you can confidently take your new knowledge into the workplace. We also have an acclaimed health and social care library and extensive e-resources to support your development.

Professional development

Keeping your skills and experience up-to-date will be crucial in helping to keep your career plans on track. Many of our courses offer recognised Continuing Professional Development (CPD) opportunities, enabling you to learn about the latest ideas, practices and developments in your profession. CPD can be achieved through short and professional courses, workshops, modules and undergraduate and postgraduate degree modules.

JOURNALISM, MEDIA AND PUBLIC RELATIONS

Bristol is the place to be for the creative industries. As one of the most successful media hubs outside of London, it attracts journalists from around the world. Working closely with a wide range of news and current affairs partners, you'll have plenty of opportunities to immerse yourself in a diverse media community while developing the skills you need to stand out from the crowd.

Find out more by visiting:
uwe.ac.uk/subjects/media

Tell a compelling story

Enhance your skills in content production for all elements of multi-media Journalism. Whichever path you take, you'll be taught by experienced journalists and academics, with input from guest speakers from across the industry. You'll also gain further industry insight from a wide range of work experience and networking opportunities and have access to our professional-standard TV and radio studios.

MA Journalism is accredited by the Broadcast Journalism Training Council (BJTC) and benefits from a unique partnership with the BBC where you'll gain valuable mentoring opportunities.

MA Journalism (Audio Docs and Podcasts) is also offered in partnership with the BBC and will develop the specialist skills you'll require to create high-quality content across different platforms.

MA Journalism (Specialist Features) will build your expertise in a specialist area of journalism such as sports, music or travel writing.

Whichever route you take you'll graduate equipped with the industry knowledge and entrepreneurial skills to fulfill your career aspirations.

Be a positive force for change

Access the full range of Professional Law programmes validated by the Solicitors Regulation Authority (SRA) and the Bar Standards Board, as well as academic master's (LLM) degrees.

Make use of our long-established connections with Bristol Law Society; regional law firms such as Thrings and Osborne Clarke, and chambers such as St John's, Albion and Guildhall Chambers. Get involved in our award-winning pro-bono activities – in 2016, we were voted pro-bono initiative of the year at The Lawyer Awards. You'll get the opportunity to secure work placements, shadow professionals and receive career guidance to support your studies and fast-track your career.

With our master's courses you will be immersed in an internationally focused learning environment, based on active academic research and taught by experts in their field.

Develop your professional skills in our £55 million state-of-the-art building where you'll have access to four mock courtrooms, equipped with the latest recording technology, Harvard style lecture theatres, plus social spaces designed for individual study, group work and local business engagement.

NURSING AND MIDWIFERY

Like yours, our focus is on making a positive difference to people's lives. Let us help you develop your clinical capabilities, intellectual capacity and professional attributes with an innovative, theoretical and practice-focused learning experience. We will empower you to challenge, lead and transform care for the better, throughout your career.

Find out more by visiting:
uwe.ac.uk/subjects/nursing

Sharpen your skills and make a positive difference

Our courses incorporate modern learning technologies and approaches, and are developed and delivered in close collaboration with our clinical partners, research colleagues and service users. You'll be taught by specialists with expert knowledge of the latest research and how it's relevant to health and social care today.

Experience first-class facilities carefully designed to develop your knowledge and skills and to suit your career progression. Practise in our multi-million pound skills and simulations suites, or in our sensory suite and consultation rooms. Everything you need to develop your professional and clinical skills is here.

We'll support you to enhance and refine your practice through theoretical underpinning. You'll gain confidence negotiating and making decisions in a fast-moving and evolving environment. There's a range of flexible post-qualifying courses and Continuing Professional Development (CPD) options giving you the support and direction you need to develop your clinical practice.

Practical learning with lifelong impact

Advance your professional practice and take your career to the next level. You'll follow a learning programme co-designed by our own academics – with vital input from industry specialists, clinical partners and researchers. Graduate equipped with new skills and a new perspective in order to rebuild lives with healthy solutions.

Our friendly, accessible academic team have a wealth of experience and a wide range of contacts to share. You'll use your practice area as a platform for further learning, ensuring that your professional development is relevant. You'll build specialist knowledge and confidence in both established health and social care settings. There's also opportunity to stretch your field further, learning beyond the UK/NHS framework to understand and explore global context within our international cohort.

The MSc Rehabilitation is designed for professionals who want to take their career to the next level whether in a leadership role, in academic research or by advancing their clinical expertise. You can study flexibly and take an entirely distance learning route if that suits you best. You'll leave equipped with the skills to step forward and lead a multidisciplinary team, solve problems in complex and unfamiliar environments and become a driver for change.

The MSc Advance Practice is a flexible course suitable for experienced health and social care practitioners, designed to develop and enhance skills that are required to become an advanced practitioner.

Designing better places for everyone

Learn about the challenges and opportunities facing our towns, cities, and rural areas. Explore major projects, infrastructure schemes, regeneration initiatives, transport and movement, the delivery of design quality, and the creation of healthy, sustainable, and resilient communities. We'll support you to deepen your understanding from case studies and field trips. It's a mix that will see you explore and critically engage with live and inspirational planning solutions from across the UK and around the world. You'll work with leading academic experts, experienced planners, community leaders and other key stakeholders, responding to wide-ranging project briefs. Our programmes offer a choice of specialisms and study methods, allowing you to find a course that suits you.

Our Royal Town Planning Institute accredited Planning School will support you to connect with our extensive industry network. You'll make the most of invaluable real world projects, professional development opportunities, skills and knowledge enhancement, and relationship building. We've also been ranked 7th in the UK for Building and Town and Country Planning courses in The Guardian university league tables 2020.

PSYCHOLOGY, SOCIOLOGY AND CRIMINOLOGY

Making a difference to society may seem ambitious, but it's exactly what you'll be doing here. Build your confidence and find new ways to apply your knowledge by getting immersed in a specialist subject. You'll develop your skills and refine your ability to question, critique and evaluate the world around you.

Find out more by visiting:
uwe.ac.uk/subjects/psychology

Enrich the world you live in

We provide a range of dynamic, accredited courses, supporting a variety of subjects. These are designed to meet nationally recognised standards for education and training, assisting you in achieving your professional goals.

Our strong networks and partnerships include NGOs, NHS partners, local schools, Avon and Somerset Police, local authorities, local prisons and housing associations. Our partners influence course content and help ensure that teaching is always in line with the skills and experience employers are looking for.

Our world-class research, volunteering opportunities and links to world-wide organisations give you the opportunity to get close to the key ideas and issues, and make the right connections. You'll also be part of work that drives change, makes news headlines and changes people's lives for the better.

We've built an excellent reputation for teaching quality and many courses are externally accredited by professional bodies such as the British Psychological Society (BPS) and Health and Care Professions Council (HCPC). Our applied courses encourage you to use your knowledge and help solve the problems many people face every day. By extending your experience, practical skills and self-awareness, we'll support you towards becoming a practitioner.

The course was amazing for making students more employable. I began work as a health promotion specialist in diabetes prevention directly after graduating.

SOCIAL WORK, ENVIRONMENTAL AND PUBLIC HEALTH

Do you believe that social, environmental and public health are intrinsically connected? We do, and we invite you to join a passionate, inclusive group of social work, specialist community, environmental and public health practitioners. Learn the new practices, share experiences, discuss the latest policies – and discover how to implement them in real life.

Find more by visiting:
uwe.ac.uk/subjects/socialwork

Join a caring community to take your next career step

Our links with a wide variety of organisations and our passionate academics mean you'll be fully supported during your degree, and feel empowered to make real change. Learning is hands-on, collaborative and simulation-focused, building the skills and knowledge to change lives in practice. Make the most of brand new facilities, and feel part of a community of health and social care professionals – and professionals-to-be.

We welcome part-time students, and our courses can run alongside work. The PGCert Approved Mental Health Practice is a practical course, created and delivered with local authorities, practicing professionals and service users. The MSc Professional Development (Social Work) consolidates and expands on existing knowledge, and is part of a Professional Development Framework that means you can work through a range of awards[†], building over time to a full master's.

The MSc Public Health is designed for ambitious change-makers, and helps you grow your knowledge and critical thinking to the next level. This internationally accredited programme is aligned with UK and international professional competencies for public health practice, to prepare you for a wide range of careers in public health.

The flexible, professionally accredited MSc Environmental Health programme opens doors to a career in protecting and improving the environments where people live and work, and safeguarding public health.

THE APPLICATION PROCESS

We've pulled together some useful information regarding the application process but if you have any other queries about applying to UWE Bristol, we are always happy to answer them. Simply email admissions@uwe.ac.uk or call us on +44 (0)117 32 83333.

Making your application

Postgraduate taught courses

With the exception of the courses listed below, you should apply online at uwe.ac.uk using the 'apply now' link on your chosen course web page. Or you'll be given details of how to submit your application through the appropriate Clearing House.

Graduate Diploma in Law (GDL) and LLM in Advanced Legal Practice (including the Legal Practice Course)

Applications for the full-time GDL and LLM in Advanced Legal Practice are made through the Central Applications Board (CAB) and are available online at lawcabs.ac.uk. Applications for the part-time routes are made directly to UWE Bristol using the online application on the course web page.

LLM Bar Professional Studies (BPTC)

Applications for the full-time and the part-time BPTC must be made via the central online applications system barsas.com. First round applications open in December of the year before entry and close in mid-January.

Postgraduate Certificate in Education (PGCE)

Applications must be made through UCAS Teacher Training (UTT). Search 'teacher training apply and track' on ucas.com

Successful applicants must provide a satisfactory declaration of health and a further declaration of criminal convictions (Disclosure and Barring Service clearance) before taking up their place. Applicants will be required to pass skills tests in numeracy and literacy.

Professional and short courses

The application process for professional and short courses can vary according to the course. Your application will be considered by a member of staff from the department where you will be studying.

Please visit: uwe.ac.uk/professionaldevelopment for more details on how to apply to these courses.

Research degrees

Please visit uwe.ac.uk/research and use the contact details provided in the relevant subject section.

Welcoming diversity

Inclusivity is one of our core values at UWE Bristol. We have a commitment to actively recruit and attract a more diverse student body, from a wide range of academic and social backgrounds. We consider each application on the basis of an applicant's suitability for the course applied for.

The University is committed to inclusive teaching, assessment and the development and delivery of an inclusive curriculum. We aim to create a truly inclusive university, a place where everyone thrives, there is mutual respect and each individual can see differences as strengths. We encourage staff and students at every level in the organisation to commit to these values.

Disabled students

UWE Bristol welcomes applications from students who are disabled, including those with mental health conditions, medical conditions and specific learning difficulties such as dyslexia. Approximately 13% of UWE Bristol students have disclosed as disabled.

Please disclose on your application, so we can start to explore your needs with you. If you do disclose, you may be asked to provide additional information about your access and support needs via a questionnaire.

We'll offer you advice related to your disclosure and in some cases, invite you to speak or meet with us in advance of your course starting. We'll help you with reasonable adjustments, support and equipment, including funding. We'll be happy to help with any questions you have at any point in the process.

You can disclose to us at any time and if you do, we'll only share this information with staff involved with organising your support and reasonable adjustments. It's best to disclose at application stage if possible. The information you disclose will not have an impact on whether you are made an offer to study at UWE Bristol.

Contact the Disability Service:
Telephone +44 (0)117 32 85678
Email disability.advisers@uwe.ac.uk
uwe.ac.uk/disabilityservices

Considering your application

We aim to respond to your application within 14 days, although this can take longer at busy times of the year due to volume of applications. To help us to achieve this, please ensure that you complete all sections of the application form and upload your academic transcripts and two references. On receipt of your application, we will follow the application process outlined below:

- Send an email acknowledging receipt.
- Email a link to your personal UWE Bristol Welcome web page where you will be able to view decisions taken on your application and any communications we send you.
- Check your application details are complete and request any additional information we require.
- Assess the suitability of your academic qualifications, including English language ability for international applicants.
- Read your personal statement for evidence of an understanding of, and commitment to, your chosen programme of study as well as details of career or educational aspirations.
- Inform you of the outcome of your application via the UWE Bristol Welcome web page, or through the appropriate Clearing House.

For further information regarding our admissions policy please read the PDF version located on our website:
uwe.ac.uk/policy

Immigration-Visa

If you require a visa to study in the UK, you will need to apply for a General Student Visa under Tier 4 of the Points Based System (PBS) immigration system. To apply for a visa under Tier 4, you must have an unconditional offer of a place to study and be issued a Confirmation of Acceptance for Studies (CAS) from an institution which holds a sponsor licence as your visa will be linked to this institution. UWE Bristol has been approved as a Tier 4 sponsor.

Some postgraduate taught courses and some research programmes of longer than six months may require Academic Technology Approval Scheme (ATAS) clearance. If you are studying a course which does require ATAS clearance, we will send you a separate letter to allow you to complete the online application form.

For information on courses which require ATAS clearance, search ATAS on gov.uk

ENTRY REQUIREMENTS

We keep our entry requirements as straightforward as possible and our standard requirements are explained below. You'll see any course-specific entry requirements within each course listing on the website.

Standard entry requirements

- Normally a first degree minimum 2:2 or above from a UK institution, or a degree of comparable standard from an institution outside the UK, unless otherwise stated in the course listing on the website.
- Applicants who can demonstrate relevant significant life or work experience, other qualifications, or their potential to benefit from the course will also be considered.
- The University may be able to recognise successful previous study through Accredited Learning (AL), or assess and award credit through Accredited Experiential Learning (AEL) for knowledge and skills gained in accordance with the University's Academic Regulations. Please contact us if you think you are eligible to be considered for AL or AEL.
- Applicants for postgraduate research degrees may also be considered on the basis of previous research activity or publications, other qualifications and/or significant life or work experience.

International qualification equivalents

If you have studied outside the UK please visit: uwe.ac.uk/international for country-specific information about qualifications from all over the world.

UWE Bristol English language requirement

All UWE Bristol students must have a recognised English language qualification of at least GCSE grade C/4 or equivalent standard. There are specific English language requirements for international and EU students.

If you have a UKVI approved Secure English Language Test (SELT) but not at the required level for entry, you may be able to undertake one of UWE Bristol's Pre-sessional English Language courses to help you achieve the required level.

For details of the recognised English language qualifications and required levels, please visit uwe.ac.uk/international

FEES AND FUNDING

Tuition fees

At the time of printing this prospectus, the tuition fees for 2019 have not been set. For guidance, please see the fees and funding information for 2018/19 on the course pages of our website uwe.ac.uk

Tuition fees for part-time study are up to the pro-rata amount of the full-time equivalent.

Please note that international students are not normally able to study part-time due to the immigration restrictions of the Tier 4 student visa.

You can find the latest information on fees for home/EU and international students on our website uwe.ac.uk/money

Course costs

Your course will involve additional costs such as books, printing and photocopying, materials, optional field trips and software.

Your tuition fees will cover the cost of compulsory field trips.

Funding options

The government has announced funding for EU students will continue to be available for courses starting in the 2020/21 academic year. The maximum loan for courses starting from 1 August 2019 is £10,906.

Maximum loan for 2020/21 is still being determined by the government. When the loan amount is finalised further details will be on our website:

uwe.ac.uk/postgraduatefunding

Data protection

Personal data about students, including records of academic achievements, are stored by the University in accordance with General Data Protection Regulations. The Data Controller for applicant details is the Pro-Vice Chancellor (Commercial Director and Corporation Secretary).

Quality assurance

The University's quality assurance processes are subject to review by the Quality Assurance Agency for Higher Education (QAA).

Disclaimer

We've made every effort to make this prospectus as accurate as possible at the time of going to print (August 2019). However, the prospectus is printed up to two years in advance.

We continually enhance our offer by responding to feedback from our students and other stakeholders, which may result in changes to courses after the prospectus is published.

You'll find the most up-to-date information about our courses on our website.

Very occasionally we have to withdraw or combine courses due to limited demand, as this will have a negative impact on the student experience. When this is the case, we'll advise you as soon as possible before the start of the programme and aim to provide a suitable alternative.

Wherever possible, we use images of our campus and students. Occasionally we use stock images for illustrative purposes.

Accreditation

Our accreditations are continually reviewed by external bodies. For full details on our individual course accreditation, please refer to our online course entries.
